

Prvi diplomanti in začetek novogradnje Medicinske fakultete

Na Medicinski fakulteti, ki je bila ustanovljena z odlokom o preoblikovanju Univerze v Mariboru, ki ga je 2. oktobra 2002 soglasno sprejel Državni zbor Republike Slovenije, bomo kmalu dobili prve diplomante. 3. decembra 2003 je Svet za visoko šolstvo potrdil univerzitetni študijski program Splošna medicina in z razpisom objavil tudi 80 vpisnih mest. Prva generacija študentov medicine se je vpisala v študijskem letu 2004/2005, v študijskem letu 2009/2010 pa smo vpisali prvo generacijo študentov po prenovljenem in z bolonjsko deklaracijo usklajenem programu enovitega magistrskega študija Splošna medicina, potrjenem na Svetu za visoko šolstvo Republike Slovenije 5. maja 2008.

Medicinska fakulteta je članica Univerze v Mariboru s sedežem na Slomškovem trgu 15 v Mariboru. Na ozemlju Univerzitetnega kliničnega centra Maribor se nahajata Inštitut za anatomijo, histologijo in embriologijo in Inštitut za fiziologijo, v neposredni bližini pa tudi sodoben laboratorijski center. Novembra smo odprli simulacijski center, ki je zanesljivo najsodobnejši v tem delu Evrope in v katerem bodo študentje medicine nabirali izkušnje v simuliranem okolju pred stikom z realnim bolnišničnim okoljem.

Mednarodno primerljiv študijski program enovitega magistrskega študija Splošna medicina ponuja študentom pod vodstvom in ob nadzoru učiteljev obilo praktičnega dela ob bolniku in omogoča mednarodno izmenjavo študentov in profesorjev z medicinskimi fakultetami znotraj Evropske unije pa tudi izven nje. Študentom zagotavljamo ustrezna bazična in klinična znanja ter večšine in jih vzgajamo v smislu visoke etičnosti in za bodočega zdravnika primerne vedenja. Naš temeljni cilj je pripraviti študente za samostojno delo zdravnika.

Enovit magistrski študij Splošna medicina traja 6 let oziroma 12 semestrov, obsega 5775 ur teoretičnega in praktičnega študija in je ovrednoten s 360 ECTS točkami. Študentje lahko ob 52 obveznih predmetih izbirajo tudi med 35 izbirnimi predmeti, pri katerih lahko poglobljeno razvijajo svoje znanje in sposobnosti. Poglavitna značilnost enovitega magistrskega študijskega programa Splošna medicina je tesna prepletenost predmetov znotraj posameznih letnikov (horizontalno) in med letniki (vertikalno). Vlogo povezovalca imajo PBL-moduli (Pro-

First graduates and building the Faculty of Medicine

The Faculty of Medicine, which was established with the decree to reform the University of Maribor, was unanimously accepted by the National Assembly on 2 October 2002, and will soon receive its first graduates. On 3 December 2003, the Council for Higher Education confirmed the University study program in General Medicine and announced 80 enrollment posts. The first generation of medical students enrolled in the 2004/2005 academic year, and in the 2009/2010 academic year we enrolled the first generation of the modernized and adjusted program by the Bologna declaration of a uniform master's degree study program in General Medicine confirmed by the Council of Higher Education of Slovenia on 5 May 2008.

The Faculty of Medicine is a member of University of Maribor, which is situated at Slomškov trg 15 in Maribor. On the grounds of the University Clinical Centre of Maribor, the Institute for Anatomy, Histology, and Embryology and the Institute for Physiology are located, and located next to the Institutes is our modern laboratory centre. In November, a simulation centre was opened which is the most modern such facility in this part of Europe, and in which medical students will experience a simulated setting before getting in touch with a real hospital environment.

The internationally comparable uniform master's degree study program in General Medicine offers students considerable practical work with patients under the guidance and supervision of teachers, and enables international exchange for students and professors at faculties of medicine inside and outside the European Union. Students are assured adequate basic and clinical knowledge and skills, and are educated in the sense of high ethics and proper conduct for future doctors. Our primary aim is to prepare students for the independent work of a doctor.

The uniform master's degree study program in General Medicine lasts 6 years or 12 semesters, and includes 5775 hours of theoretical and practical studies and is worth 360 ECTS points. Students have 52 obligatory subjects, but can also choose from 35 selective subjects in which they can further develop their knowledge and skills. The main characteristic of the uniform master's degree study program in General Medicine is the tight connection of subjects inside individual study years (horizontal) and between individual study years (vertical). Problem-based

blem Based Learning), ki jih v slovenskem prostoru izvajamo edino na naši fakulteti. Na osnovi središčnih problemov v obliki spirale pokrivajo vsa področja medicine od poznavanja temeljev teorije in prakse, usposabljanja v kliničnem okolju in postopnega doseganja samostojnosti, ki študente vodi v samostojno poklicno pot zdravnika. V šestih letnikih je v tem študijskem letu vpisanih 514 študentov, med njimi so tudi tujci iz Brazilije, Hrvaške, Makedonije in Nemčije.

Poudariti moramo tudi razgibano mednarodno dejavnost naše mlade fakultete: v tem študijskem letu študira 20 študentov en ali dva semestra na fakultetah po Evropi, s katerimi imamo podpisane sporazume o sodelovanju. V okviru programov izmenjav študentov in učiteljev Erasmus in Tempus imamo podpisane pogodbe z medicinskimi fakultetami in medicinskimi univerzami iz Bologne in Trsta v Italiji, Aachna, Göttingena, Tübingena, Leipziga, Würzburga, Hamburga, Mainza in Greifswalda v Nemčiji, Gradca, Innsbrucka in Dunaja v Avstriji, Oula iz Finske, Debrecena in Pecza iz Madžarske, Prage iz Češke, Plevna iz Bolgarije, Cluj Napoca iz Romunije, Porta in Lisbone iz Portugalske, Barcelone in Malage iz Španije, Tel Aviva in Jeruzalema iz Izraela, Bruslja in Ghenta iz Belgije, Krakowa iz Poljske, nadalje z medicinskimi fakultetami v Zagrebu na Hrvaškem, Sarajevu v Bosni in Hercegovini ter Beogradu in Nišu v Srbiji. Načrtujemo podpis sporazumov še z drugimi uglednimi fakultetami. Povedati je treba, da tudi naša fakulteta iz leta v leto gosti več tujih študentov, predvsem v kliničnem delu študija.

Na Medicinski fakulteti Univerze v Mariboru od leta 2005 poteka tudi podiplomski študij Biomedicinska tehnologija, ki je edini takšne vrste v slovenskem prostoru, saj ponuja številne vsebine s širšega interdisciplinarnega znanstvenega in raziskovalnega področja. Individualna naravnost študija pa podiplomskim študentom omogoča sestavo programa, ki kar najbolj zadovolji strokovne in raziskovalne interese posameznika.

V juniju 2010 zaključuje študij Splošne medicine prva generacija študentov.

Skupaj smo prehodili dolgo, včasih tudi naporno pot. Našim študentom za popotnico v poklic dajemo znanje, na srce pa polagamo topel človeški odnos do bolnikov.

Pred nami so še številni izzivi, ki jih bomo lahko uresničili v novi zgradbi Medicinske fakultete, ta bo stala v neposredni bližini Univerzitetnega kliničnega centra Maribor, kar bo pomembno prispevalo k našemu še boljšemu delu.

Z gradnjo nameravamo začeti še to leto in predvidevamo selitev v letu 2012.

Prof. dr. Ivan Krajnc,
Dekan Medicinske fakultete
Univerze v Mariboru

learning (PBL)-modules, which in Slovenia are only carried out at our faculty, have the role of connectors. On the basis of central problems in a spiral form, they cover all areas of medicine, from knowing the basic theory and practice, efficiency in a clinical environment, and gradually attaining independence that leads students into an independent career as a doctor. Five hundred fourteen students are enrolled in all 6 study years, among them foreign students from Brazil, Croatia, Macedonia and Germany.

The active international work of our young faculty must be emphasized. In this study year, 20 students are taking 1 or 2 semesters at faculties around Europe, with which we have signed agreements of cooperation. Within the student and teacher Erasmus and Tempus exchange programs, we have signed contracts with faculties and universities of medicine in the following cities: Bologna and Trieste in Italy; Aachen, Göttingen, Tübingen, Leipzig, Würzburg, Hamburg, Mainz and Greifswald in Germany; Graz, Innsbruck, and Vienna in Austria; Oulu in Finland; Debrecen and Pecs in Hungary; Prague in the Czech Republic; Plevna in Bulgaria; Cluj Napoca in Romania; Porto and Lisbon in Portugal; Barcelona and Malaga in Spain; Tel Aviv and Jerusalem in Israel; Brussels and Ghent in Belgium, Krakow in Poland; Zagreb in Croatia; Sarajevo in Bosnia and Herzegovina; and Belgrade and Nis in Serbia. Signing agreements with further distinguished faculties are planned. It has to be said that our faculty hosts more and more students from year-to-year, especially in the clinical part of the study program.

From 2005, the Faculty of Medicine of the University of Maribor has also carried out a postgraduate study program in Biomedical Technology, which is the only one of its kind in Slovenia, while it offers much content from a broader interdisciplinary scientific and research area. The individuality of the study program enables postgraduate students to construct a program which will fulfil expert and research interests of an individual in the best way.

In June 2010, the first generation of students of the study program in General Medicine will graduate.

Together we travelled down a long and sometimes difficult path. We give our students knowledge for their careers and appeal to their hearts to build a warm relationship with their patients.

We are facing many challenges which we will be able to fulfill in the new building of the Faculty of Medicine. The new Faculty of Medicine will stand close to the University Clinical Centre of Maribor, which will make a significant contribution to the quality of work of our faculty. We expect to start construction this year and we plan to occupy the new facilities in 2012.

Professor Ivan Krajnc,
Dean of the Faculty of Medicine
University of Maribor
